Understanding the Healthcare Needs of People Living with Pelvic Pain

The study is open to all Australian women and gender diverse people (presumed female at birth), aged 18+ years, who experience persistent pelvic pain.

Our research team would like to understand your healthcare needs and experiences for managing your pelvic pain (e.g., endometriosis, vulvodynia, painful bladder, painful sex).

We are interested to know what types of care and information you would like, and how you would like your health team to work with you, and each other.

You can express your interest using the QR code or survey link http://tinyurl.com/ppaincare

You can email any questions to <u>Catherine.Andrews@utas.edu.au</u> or <u>Leesa.vanniekerk@utas.edu.au</u>
